

## Year 12 work experience in Aurillac

For the fourth year in succession, five Sixth Formers went to Aurillac in the Cantal region for a trip that combined both work experience and the opportunity to see the culture first-hand. The programme enabled them to use their language skills in the workplace. Not only did they practise their language skills, they also gained in confidence, independence and developed life skills in day-to-day situations. This year placements included: Pharmabiotic Research Institute, council services (youth and sport), book shops, estate agent and in a school.

A quote from Freddie (then in Yr12): "Aurillac was a brilliant experience. I met loads of great people, improved my French and, on top of everything else, improved my CV with some very impressive work experience in another country. I would highly recommend this trip to anyone as a great way to have some fun and speak some French."
